Arseni Atrokhov

Roblox Developer and Game Prototyper

Gomel, Belarus (UTC+3) | arsen123593@gmail.com | Telegram: @qintin

GitHub | LinkedIn | Playable portfolio

I develop Roblox games in Luau and playable HTML5 prototypes. My work includes gameplay, UI, client/server systems and playtesting. I use Claude Code and Codex for implementation and iteration, with hands-on task definition, debugging and acceptance checks. My own Roblox pet project is published.

SKILLS

Roblox Studio, Luau, RemoteEvents, DataStore, TeleportService, NPCs, UI, Rojo, Git, HTML5 / JavaScript, Figma, Playwright; Claude Code, Codex, Gemini.

SELECTED PROJECTS

SoapCutting / +1 Knife Size Every Cut | View

Personal pet project; published; redesign in progress

Initiated and built the game with AI coding tools: gameplay loop, equipment progression, UI, implementation direction and playtesting. The published version combines knife throwing, soap mining, a foam-wave escape and raft processing. The new cutting and onboarding redesign is work in progress.

Fish & Survive: Zombie Lake | View

Current project with a collaborator

Worked across client/server scripts with AI tools, redesigned UI, populated the map and directed model creation. We developed mechanics together; I refined and integrated them. The project includes lobby/match places, reserved servers, teleports, shared persistence with session locks, classes and quests. I also mentored my collaborator in Luau, Rojo and AI workflows.

Roblox Feature Pack | View

Hand-written Luau in 2025; later AI-assisted refactor

Checkpoints, teleports, GUI clicker, RemoteEvents, DataStore and animation. The refactor adds server validation, rate limiting, a Rojo structure and automated checks.

AI Game Market | View

83 games and prototypes, 69 game teardowns

My complete browser-game portfolio across several genres and mechanics. Examples include Deep Contract, 12-Second Heist and Breaking Storm Live. Reference research, game rules, AI implementation direction and playtesting; both individual and collaborative work.

EXPERIENCE

Independent game studio · Game research, prototyping and QA | Jul–Oct 2026 · contract

Analysed references and competitors, wrote prototype specifications, built browser games with AI agents, playtested builds and reported defects. Created tools for the research workflow.

Itgenio · Game-development instructor | Dec 2019–Jul 2026

Taught Roblox Studio and Luau: gameplay, UI, NPCs, persistence and client/server communication. Read and debugged unfamiliar student code.

Freelance UI/UX designer | 2021–2026

Paid Figma work for mobile games and apps: user flows, navigation, feedback and screen states.

EDUCATION AND WORK FORMAT

Francisk Skorina Gomel State University · Mathematics · 2017–2021.

Remote, full-time; based in Belarus, no relocation. Russian: native. English: elementary; written communication with translation tools.
